

I understand that there could be a change in LPFM stations that would negatively affect K-LOVE FM translators. I hope this is NOT the case. I frequently travel across western Colorado, and it's a joy and comfort knowing I can listen to quality music as I travel. Many of these rural areas offer no other broadcast, and if a change were to affect this current configuration, I doubt I would receive the quality programming I receive now. Being a donor to K-LOVE, I've grown to expect the service I'm currently receiving from them in their widespread coverage. K-LOVE offers a positive message that serves many people in this area, a message you will not find in many other types of media today.
